

KUUT Steam M

**More space,
the same Nordic
quality**

The KUUT M is a spacious outdoor sauna designed for those who value comfort, craftsmanship and timeless Scandinavian design. With generous interior space, it provides the ideal setting for relaxing with family or friends while creating a seamless extension of any outdoor living area.

Constructed from premium insulated timber, the KUUT M delivers outstanding thermal performance throughout the year, ensuring an efficient and enjoyable sauna experience in every season. Delivered fully assembled and ready for installation, it requires only an electrical connection, allowing you to enjoy authentic Nordic wellness with minimal effort from day one.

Key features

Exterior

Built with a durable thermally treated timber exterior combined with high-performance XPS insulation. The robust wall construction provides excellent weather resistance while maintaining an elegant Scandinavian appearance suitable for both residential and commercial environments.

Interior

The spacious interior features premium thermo-treated wood, quality tiling and carefully selected finishing materials to create a comfortable and luxurious steam bathing experience. Every detail is designed for durability, easy maintenance and everyday comfort.

Lighting

Integrated warm white LED lighting creates a relaxing atmosphere throughout the steam room. Optional RGB fibre optic lighting allows additional ambience customisation to suit different moods and environments.

Floor

The insulated floor structure combines XPS insulation, waterproofing and durable non-slip tiles to provide long-term performance, comfort and reliable heat retention.

Steam system

Powered by a professional 6 kW steam generator, delivers fast and consistent steam production. The system can be equipped with an automatic discharge valve, fragrance pump and additional wellness accessories for an enhanced user experience.
