

# KUUT Steam S

## Compact steam wellness, designed for two

The KUUT Steam S is a compact outdoor steam sauna created for two people, bringing the comfort and health benefits of steam bathing to smaller outdoor spaces. Its efficient footprint makes it an ideal choice for gardens, terraces and poolside environments without compromising on performance.

Built with an insulated timber structure, the cabin retains heat efficiently throughout the year, while the integrated steam generator brings the sauna to operating temperature in less than 30 minutes. Delivered fully assembled, the KUUT Steam S requires only a water supply and electrical connection, offering a refined and effortless wellness experience from day one.

# Key features

## Exterior

The insulated timber construction is designed for reliable year-round performance. High-quality Nordic thermo wood combined with XPS insulation provides excellent heat retention while ensuring durability in demanding weather conditions.

## Interior

The interior combines premium thermo-treated timber, quality tiling and carefully selected materials to create a clean, comfortable and relaxing steam bathing environment.

## Lighting

Warm white LED lighting enhances the atmosphere throughout the cabin. Integrated lighting creates a welcoming ambience, while optional RGB fibre optic lighting offers additional customisation.

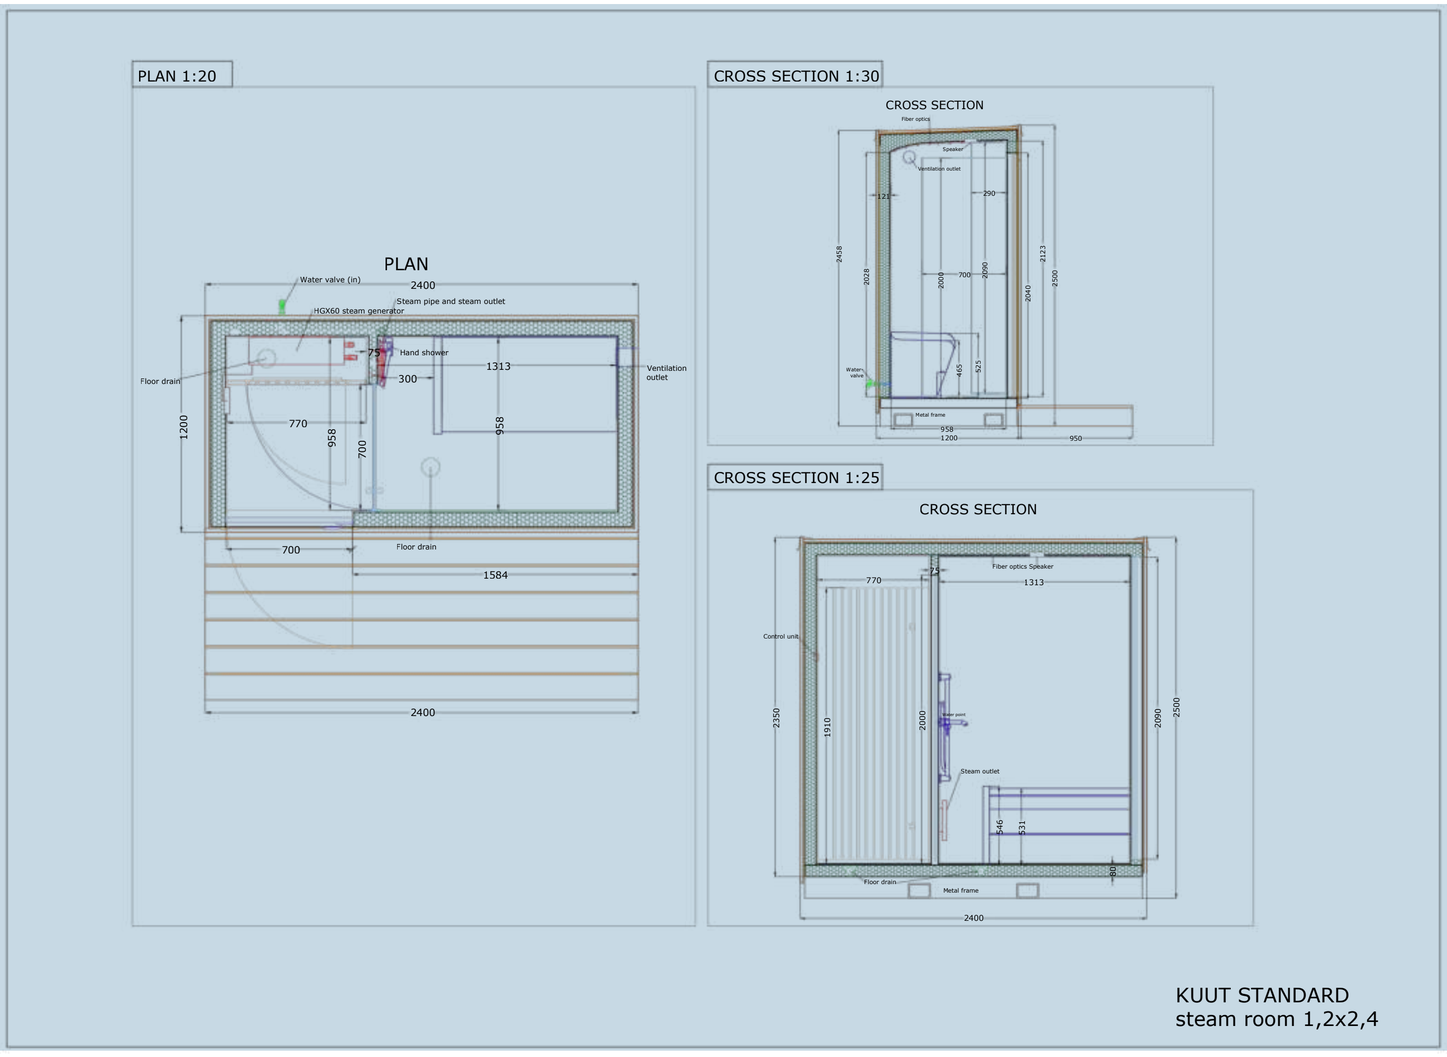

## Floor

The insulated floor features durable non-slip tiles, providing comfort, safety and long-lasting performance in everyday use.

## Steam system

Powered by a 4.5 kW automatic steam generator. The system can be complemented with an automatic discharge valve and fragrance pump for an enhanced wellness experience.
